

Quick Start Guide

SmartVU Home Wireless Camera

Model No: CAMVU1

www.smartvuhome.co.nz

Please read this quick start guide carefully before using, and keep it for future reference.

Welcome

Thank you for choosing this SmartVU Home camera. Getting started is easy.

1. What's Included

Security Camera

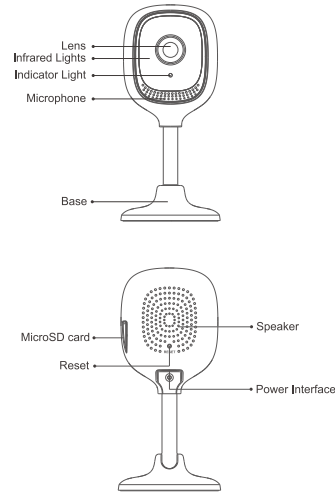

Power Adapter

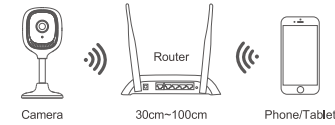

Quick Start Guide

2. Product Details

3. Connection Preparation

Place the camera and your phone or tablet within 30-100 cm of the Wireless Router during setup.

Note: Make sure your phone or tablet is connected with the Wireless Router. Please note the camera will only connect to 2.4G Wi-Fi, not 5G Wi-Fi.

4. Download the SmartVU Home App

If you haven't already, download and register an account on the free SmartVU Home app.

It is available on both iOS and Android.

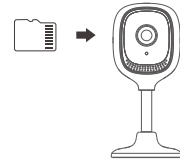

Simply search "SmartVU Home" or you can scan the QR Code on the next page.

Launch the app from your phone and select the Register button. Follow the on-screen instructions.

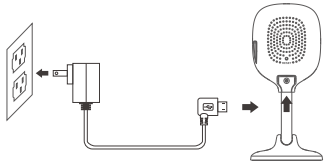

5. Insert the Micro SD card

If you wish to enable local recording, please insert a Micro SD card (up to 128GB) gently into the side edge of camera.

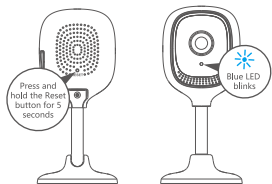

4. Connect the power to the Camera

Connect the power to the camera by Micro USB Power Adapter (DC 5V/1A).

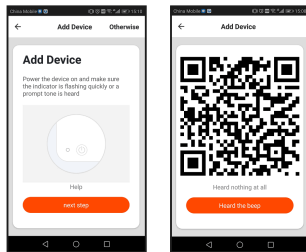

5. Set up your Camera

Press and hold the Reset button for 5 seconds, then release the button to reset the camera, the LED light will blink quickly.

In the SmartVU Home app, click "Add Device" or "+" in the top-right corner to Add Device.

Select **Security & Sensors**, then **Smart Camera**.

Follow the app's on-screen instructions.

Hold the QR Code that appears on your phone or tablet approx. 15-20 cm from the SmartVU Home camera lens.

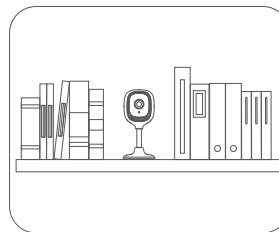

Click "Heard the Beep" when you hear the audible beep from the camera.

Your SmartVU Home camera has now paired successfully.

6. Positioning your Camera

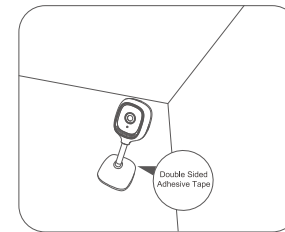

You can place your camera on a shelf or other flat surface.

It is designed to be discreet, so you can slip it between some books on a shelf or beside a larger item.

To mount your Camera on the Wall:
We recommend the use of double sided tape with a sufficient adhesive to mount the camera.

Make sure the surface contact areas are free from dirt, and moisture before applying tape.

You're done!

Congratulations! Your camera is set up and ready to go.

Appendix: Camera LED Guide

	LED Status	Camera Status
